Toyota Accessories

For the adventurer, the family of travellers or the hardworking tradie, whoever you may be, ARB will be there every step of your journey, offering you the highest calibre 4x4 accessories on the market.

With an unrelenting commitment to innovation and engineering excellence, an extensive network of retail outlets and workshops around the world and exceptional after-sales support, you can be assured you're getting quality products, reliable service and sound advice.

Protection Equipment

OUR PROTECTION GEAR HAS BEEN DESIGNED FOR MAXIMUM STRENGTH, STYLE AND PRACTICALITY.

Vehicle protection is one of the main priorities for owners of 4WD and commercial vehicles. Bull bars, rear bars and side rails and steps will help prevent expensive panel damage, especially when heading off road, as well as providing a solid base on which to mount a range of accessories like winches, driving lights and antennas. Like all of our products, our protection gear has been designed for maximum strength, style and practicality.

Summit MKII Bull Bar

The ARB Summit MKII Bar muscled up with the most innovative and advanced technology, all while fully integrating with Toyota's suite of advanced driver assist safety technology. The Summit MKII Bar has eliminated front buffers and now has robot welds on the front face of the bar for a seamless finish. The fog light cluster design offers a modern and integrated approach, incorporating the sequential indicator, clearance light, daytime running light (DRL) and fog light within one complete unit. With all the essential features such as winch compatibility, antenna mounts, dual jacking points and driving light mounts as well as optional colour-coding, the Summit MKII Bull Bar is the ultimate addition to any modern 4WD.

→ Available for 300 Series and HiLux

Summit Bull Bar

Built on ARB's tradition of pioneering innovation and bringing a fresh, contemporary design for modern-day vehicles, the ARB Summit Bull Bar uses press-forming technology and incorporates a larger tube diameter to deliver the ultimate in strength and aesthetics. Compatible with the latest vehicle safety systems and encompassing a range of practical features including provision for driving lights and electric winch models, as well as protection against corrosion, the ARB Summit Bar represents the pinnacle in frontal protection.

The Summit Bar comes standard in a hard-wearing black powder-coat finish, with the option to colour-code.

→ Available for HiLux, Prado

Summit Sahara Bar

Featuring many of the protection and design elements of the ARB Summit Bar, the Summit Sahara Bar offers modern vehicle owners the choice of a polished or painted aluminium centre tube for a uniquely different look to the more traditional bull bar, while maintaining a high level of impact protection.

The Summit Sahara Bull Bar comes standard in a hard-wearing black powder-coat finish, with the option to colour-code.

→ Available for HiLux and Prado

Alloy Bull Bar

The ARB Alloy Bull Bar offers yet another choice for frontal protection. With styling elements designed to complement modern 4WD vehicles, the bar is manufactured from lightweight and corrosion-resistant alloys, with a steel substructure and mounting system for maximum strength.

Like all other ARB bars, the Alloy Bull Bar utilises renowned manufacturing processes throughout, ensuring strength and durability.

→ Available for Prado

Deluxe Bull Bar

Manufactured from steel for ultimate strength and powder-coated for durability, the Deluxe Bull Bar is available in both winch and non-winch applications (dependent on model). Incorporating a range of practical features, the Deluxe Bull Bar provides a solid platform on which to add a range of accessories including electric winches, auxiliary driving lights and communication antennas.

→ Available for 70 Series

Commercial Bull Bar

Favoured by government and fleet operators, the Commercial Bull Bar uses a simplified manufacturing process to achieve cost-effective vehicle protection without some of the more aesthetic features. Incorporating a range of practical features, the Commercial Bull Bar provides a solid platform on which to add a range of accessories including electric winches, auxiliary driving lights, communication antennas and safety flags.

→ Available for HiLux, 70 Series and Prado, 300 Series

SpartanBar

Manufactured from durable UV-stabilised polymer, the ARB SpartanBar offers an alternative for those looking for a lighter alternative to traditional steel bull bars. The ARB SpartanBar undergoes a rotational moulding process that creates a one-piece hollow-bodied bar featuring the unique ability to flex, absorb and disperse impact energy forces, then return back to its original shape.

→ Available for HiLux, Prado and 70 Series

StealthBar

The ARB StealthBar provides an alternative tough aesthetic appearance without compromising on vehicle protection, at approximately 30% less weight than an ARB SpartanBar. Designed using the same cutting-edge polyethylene material and manufacturing process, these bars are now the only bull bars approved for use in Europe.

→ Available for HiLux and Prado

Side Rails and Steps

ARB offers a range of side rails and steps specifically designed to protect your doors, side sills and front quarter panels from damage off road, as well as aiding access to and from the vehicle.

Suitable for Summit and Commercial style bars, the Summit Side Rails and Steps have been designed to incorporate a sleek extruded aluminium step section and an integrated clamp system for bull bar attachment. For those not requiring side rails, a stand-alone step can be fitted.

→ Available for HiLux, 300 Series, 70 Series and Prado

Under Vehicle Protection

When travelling off road, the underbody of your vehicle is very susceptible to damage. ARB's Under Vehicle Protection systems are designed to protect these vulnerable areas from rocks, logs and ruts, which can often be encountered in more challenging terrain.

Features

- Vehicle-specific design
- Pressed and folded three-millimetre laser-cut steel, providing more strength than folded steel alone and increasing the strength-to-weight ratio
- Protection panels are zinc-plated and powder-coated in a silver textured finish
- Recessed mounting bolts are protected and easy to remove for vehicle servicing
- Compatible with all ARB products
- Steel components are protected with either powder coat or zinc plating

→ Available for HiLux, 300 Series and Prado

Recovery Points

It is important to have strong, reliable recovery points when travelling off road. ARB has sought to set an industry benchmark for how recovery points are designed, tested and selected by 4WDers. Each vehicle-specific recovery point undergoes considerable research and design, and is rated for use with a 4.75-tonne rated bow shackle and an 8,000-kilogram snatch strap. Manufactured from steel plate, ARB's Recovery Points are rated for angled recovery and use vehicle-specific mounting systems to ensure the fitment does not affect airbag deployment or the crash pulse of the vehicle.

→ Available for Prado, HiLux, 70 Series and 300 Series (Forged Recovery Points as seen in image)

Summit Rear Step Tow Bar

Providing both maximum towing capacity and increased rear end protection on and off road, the Summit Rear Step Tow Bar combines class-leading design, proven ARB engineering and a no-compromise approach to protection and performance. Built around a tubular steel subframe, the Summit Rear Step Tow Bar includes an integrated tow hitch, provisions for an ARB air compressor outlet, trailer camera wiring, 50-amp Anderson plug and trailer plug wiring.

With press-forming used throughout for increased strength, the Summit Rear Step Tow Bar is ready for the most demanding off road use.

→ Available for HiLux

Summit Raw Rear Step Tow Bar

The Summit Raw Rear Step Tow Bar offers customers that have a factory fitted towbar a fully integrated rear step protection solution that has provisions for trailer plug wiring, a compressor outlet, trailer camera wiring, parking sensors and a 50-amp Anderson plug.

Featuring a 60.3-millimetre tube finished with a textured black powder coat, the Summit Raw has been designed to provide protection against the lower sections of the vehicle tub whilst retaining style cues from the Summit Rear Step Tow Bar range.

→ Available for HiLux

Ascent Canopy

ARB's Ascent Canopy features the latest in design, technology and functionality while providing extra storage, added security and protection for belongings during on and off road travel. Designed, engineered and assembled in Australia, the Ascent Canopy has gone through a rigorous testing regime to ensure it can handle the harshest of conditions.

→ Available for HiLux

Features

- High-flow canopy vent comes as standard on the Ascent range, pressurising the canopy to aid in inhibiting dust ingress
- Frameless, tinted and tempered safety glass used for exterior windows
- Stylish and functional interior design with maximum space and concealment of fasteners and wiring looms, where possible
- An electronic unlatching system and slam-shut latches on the side and rear windows allow for one-handed operation
- Over-rail design blends the canopy to the vehicle, resulting in no visible seal
- LED interior light
- Rear spoiler incorporates an LED brake light
- Anti-entrapment dial allows the rear window to be locked or unlocked from within the canopy
- Plug-and-play wiring harness allows for keyless entry and remote central locking
- Internal, low-intrusion support frames utilised for roof rack and roof bar fitment

Classic and Classic Plus Canopies

ARB's Classic Canopy has stood the test of time, offering unrivalled quality, practicality and affordability and making it the perfect solution to increase the space and security of a utility vehicle. The Classic Canopy can be tailored to suit different requirements and has a range of accessories to complement it.

→ Available for HiLux

Features

- Weatherproof exterior with a UV-rated finish
- Central locking rear window offers added security for belongings stored in the canopy (Classic Plus only)
- Sliding or lift-up side windows available
- LED interior light
- LED brake light
- Smooth, inert materials are used in the interior, making it easy to clean
- Side and rear windows are manufactured with factory tinted and tempered safety glass
- The lift-up side and rear windows operate via gas struts to assist with opening and closing
- Available in a smooth or textured finish (Classic only)
- Optional accessories for the Classic Canopy include metal security mesh for sliding windows, flywire screen for sliding windows and high-flow canopy vent

Classic Plus Canopy

HardLid

Manufactured from three-millimetre aluminium tread plate with a reinforced frame underneath, the new ARB HardLid offers customers the perfect platform to build their back-of-ute set-up. The ARB HardLid features the tried and tested four-link hinge system seen in the ARB Sportlid and can be optioned up with premium rails, central locking and interior lighting. With a dynamic weight rating of 150 kilograms, the ARB HardLid is built tough, making it ideal for mounting rooftop tents and other accessories. Our engineers have designed the HardLid to be as versatile as possible in two minutes with two people, the ARB HardLid can be removed and set aside if an open tub application is required.

→ Available for HiLux

Sportlid

The Sportlid is an alternative to a permanently mounted canopy, providing secure storage and keeping your gear protected from the elements. With an option to mount roof accessories for additional storage, the top of the Sportlid can support a total of 75 kilograms, with a maximum of 25 kilograms if the lid is to be lifted with the cargo still mounted. With its unique hinge system, the OE styling bar can also be mounted to the Sportlid using the optional mount kit. The Sportlid is packed full of features and options to suit individual needs.

→ Available for HiLux

Tailgate Assist

Using a cleverly designed combination of dampening strut and torsion spring, the Tailgate Assist safely controls the opening speed and reduces the closing effort by over 50% to offer simple, one-handed operation.

Incorporating a combination of dampening and spring assist struts to control the easy opening of the HiLux tailgate, closing assistance is achieved using a torsion spring.

Designed with durability in mind and tested to over 40,000 cycles, which is equivalent to around 20 years of vehicle use, the Tailgate Assist is built to last.

Each kit comes with vehicle-specific hardware including mounting brackets, torsion springs and replacement tailgate cables and cable guide brackets where required.

→ Available for HiLux

Ute Liners

Compatible with all ARB canopies, ARB Sportguard and Ute Liner protect the ute tub from scratches, dents and corrosion, as well as common spills that might occur.

→ Available for HiLux

Ute Liner

The one-piece design is vacuum formed to the exact shape of the tub, is UV stable and helps prevent load movement. ARB Ute Liners are backed by a three-year warranty.

Sportguard

ARB's Sportguard utilises a simple snap-fit, five-piece design, which can easily be installed in separate sections with no drilling required and retains factory tie-down points. The anti-slip floor is a standout feature and the contoured design maximises tub space.

The ARB Sportguard is backed by a three-year warranty and is a great investment to help protect the inside of your utility.

Roof Racks and Roof Bars

A roof rack is a valuable and versatile accessory for many touring and trade vehicles, and some trips would just not be possible without one. It's the obvious place for lightweight, bulky items that are difficult to fit in the cabin of the vehicle. And with additional accessories now available, such as waterproof bags, you don't have to worry about your gear being exposed to the elements while travelling.

ARB manufactures both steel and aluminium roof racks to suit a wide range of vehicle types, covering both recreational and commercial applications:

- Deluxe roof racks
- Trade roof racks
- Canopy roof racks and roof bars
- Touring roof racks
- Cab racks
- Flat racks

Additionally, ARB also stocks Thule and Rhino-Rack roof bars and accessories.

→ Options available for 70 Series, HiLux and Prado

BASE Rack

Introducing the next phase in roof rack evolution, the ARB BASE Rack.

Ultra sleek, boasting a super low mounting profile and lightweight design, the BASE Rack provides unmatched simplicity, flexibility and personalisation in your roof rack set-up.

Setting a new benchmark in strength and integration, the BASE Rack incorporates a revolutionary dovetail mounting system that makes attaching and removing loads and accessories easier, faster and more secure.

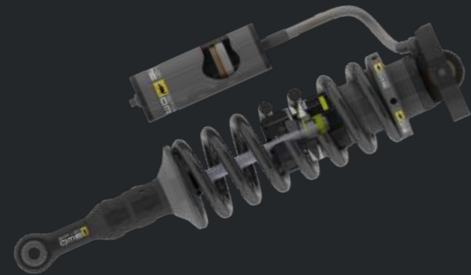

With six sizes to suit a huge range of vehicle applications and an ever-growing array of complementary accessories, the BASE Rack represents your all-in-one solution and the last rack you'll ever need.

The BASE Rack is available in a number of sizes to complement the vast range of 4WDs on the market.

Sizes/Dimensions:

- 1,255mm x 1,155mm - 12.7kg approximately*
Best suited to dual-cab vehicle
- 1,255mm x 1,285mm - 14.3kg approximately*
Best suited to dual-cab vehicle
- 1,545mm x 1,285mm - 16.6kg approximately*
Best suited to single-cab vehicle, short canopy or wagon with sunroof
- 1,545mm x 1,445mm - 18.5kg approximately*
Best suited to larger wagons
- 1,835mm x 1,155mm - 17.7kg approximately*
Best suited to narrow canopy
- 1,835mm x 1,285mm - 19.9kg approximately*
Best suited to wider canopy or smaller wagon
- 1,835mm x 1,445mm - 21.5kg approximately*
Best suited to vans and vehicles with service bodies
- 2,125mm x 1,285mm - 22.8kg approximately*
Best suited to larger cab wagon
- 2,125mm x 1,445mm - 24.5kg approximately*
Best suited to vans and vehicles with service bodies

→ Options available for HiLux, 300 Series, 70 Series and Prado

Old Man Emu has been the choice of suspension for 4WDers for many years due to the outstanding ride performance it delivers over all road surfaces. Integrated suspension packages are available to improve ride, handling and load carrying ability no matter what your requirements may be.

BP-51

The BP-51 range of high-performance bypass shock absorbers is the result of an exhaustive development process aimed at delivering the ultimate in both comfort and control.

Designed, developed and tested entirely in house by ARB's team of Old Man Emu Ride Control Engineers, BP-51 shock absorbers are vehicle specific and allow independent adjustment of both rebound and compression damping to offer class-leading ride customisation that can be tailored to individual vehicle or trip requirements.

→ Available for HiLux, 300 Series, 70 Series and Prado

Nitrocharger Sport

Nitrocharger Sport shock absorbers are an integral part of Old Man Emu's suspension systems, providing a noticeable improvement every time the vehicle is driven. Built in Australia and trusted by 4WDers throughout the world, OME Nitrocharger Sport shock absorbers set the standard in fine tuning and

ride comfort in any terrain, and simply outperform the competition.

→ Available for HiLux, 300 Series, 70 Series and Prado

Springs

Old Man Emu designs a range of coil and leaf springs, enabling the installer to match the most appropriate springs to the intended application. While ride height increases are attained, an emphasis is placed on ride control improvements.

Further fine tuning is achieved when the springs are matched to a corresponding set of Old Man Emu shock absorbers, delivering a fully integrated system designed specifically to suit your vehicle.

→ Available for HiLux, 300 Series, 70 Series and Prado

GVM Upgrades

Whether you're carrying tools of the trade or packing up the 4x4 for an extended trip, your vehicle can become dangerous and illegal if it exceeds the allocated gross vehicle mass (GVM). To combat these issues, ARB offers Old Man

Emu GVM upgrades in line with ADR requirements for a number of new, unregistered vehicles.

Speak to your local ARB store or authorised stockist for more information on GVM upgrades.

→ Available for HiLux, 70 Series and 300 Series

Upper Control Arms

When an IFS vehicle is fitted with a suspension lift, the original caster and camber results can be pushed outside the factory adjustment settings. IFS vehicles usually have a few degrees of adjustment in their camber and caster from factory and adding an OME upper control arm brings the alignment back into an acceptable range for both caster and camber adjustment.

→ Available for HiLux and Prado

Hardware

Complete suspension integration is possible with Old Man Emu's range of hardware and accessories such as greaseable shackles and bushes.

→ Available for HiLux, 300 Series, 70 Series and Prado

Frontier Tank

The ARB Frontier Tank is a lighter alternative to steel tanks and its UV-stable one-piece design utilises existing vehicle mounting points. Manufactured from a tough, cross-linked polymer, this long-range diesel tank is the easy solution to increase the range of your vehicle when both on and off road. ARB's Frontier Tank comes with a three-year warranty and can handle the most hostile of conditions.

- HiLux (2015 on) 140L diesel tank
- 70 Series (dual cab 2012 on, single cab 2016 on) 180L diesel tank

HiLux Frontier Tank shown

Other Accessories

Air Locker

Designed and manufactured in Australia, ARB Air Lockers provide increased traction at the flick of a switch, whether it's rock, clay, sand, snow or mud. With a state-of-the-art two-piece design and an uncompromising approach to manufacturing, Air Lockers are distributed in over 100 countries worldwide and are the most trusted locking differential on the market.

Fridge Freezers

Developed specifically for off road use, ARB's range of fridge freezers offer uncompromising performance, making them the perfect companion for off road travel, giving you the convenience of cold food and drinks, with rapid cooling and low power consumption. The range comes in a variety of convenient sizes, as well as offering dual- and single-zone options:

ZERO Fridge Freezers:

36L Single Zone, 44L Single Zone, 60L Single Zone, 69L Dual Zone and 96L Dual Zone

Classic Fridge Freezers:

35L, 47L, 60L, 78L

Elements Weatherproof Fridge Freezer:

60L

Intensity LED Driving Lights

Engineered in Australia, ARB's Intensity LED Driving Lights have been designed and manufactured to specifically meet the demand of 4WDers around the world.

Submersible to three metres and vibration tested to military specifications, Intensity LED Driving Lights are available in traditional round sizes (AR21, AR32 and Solis) for standard bull bar mounting or as a light bar (AR40) for a unique integrated low-profile mount, suitable for both bull bars and roof racks. Spot, flood and combination beam patterns are available (model dependent).

ARB Intensity IQ Driving lights

The ARB Intensity IQ has been developed from the ground up, with performance front of mind, whilst delivering a design that complements modern vehicle styling and bar work. With a subtle introduction of ARB red within the light, the free-form clear front lens, bezel-less design and CNC-machined ARB logo provide a modern, classy and premium new look. Featuring four unique rows of optics, this enables the user to customise the light beam pattern to suit any driving condition.

Recovery Equipment

When travelling off road, reliable and durable recovery equipment is paramount. ARB offers a large range of recovery gear that will help get your vehicle out of any sticky situation. The range includes snatch straps, recovery kits, tree trunk protectors and cable dampers. ARB also supplies a range of electric winches and Hi-Lift jacks.

Reversing Camera Systems

ARB's range of reversing cameras and monitoring systems offers exceptional reversing visibility and helps to extend the driver's vision to the rear, side, roof or front of the vehicle. Designed with flexibility and superior performance in mind, there are a multitude of options to suit every individual, providing all round safety.

Other Accessories

Auxiliary Battery Kit

Perfect for powering additional accessories without running the risk of flattening the main battery and to give you peace of mind in the event of a main battery failure, ARB has a range of dual battery kits to choose from.

Air Compressors

ARB Air Compressors are available in both portable and vehicle-mounted kits, and offer many advantages when exploring the great outdoors, such as inflating tyres and camping accessories, running air tools, activating Air Lockers, even reseating a tyre onto a wheel. All ARB Air Compressors come with a comprehensive three-year warranty with spare parts available for increased longevity.

Outback Solutions Drawers

Modular in design for user customisation, Outback Solutions Drawers can maximise the versatility of your vehicle's cargo space by being configured with fridge roller drawers, roller floors or stackable drawers. Manufactured from galvanised stainless steel with sealed roller bearings and commercial grade carpet for durability, Outback Solutions Drawers are backed by a two-year warranty.

LINX

LINX is a unique modern controller that declutters the dashboard and centralises the command of vehicle accessories by replacing classic switches, gauges and monitors with one sleek and smart driver interface. Built on an expandable platform, LINX will continue to evolve your on and off road driving experience both now and into the future.

Safari Snorkels

A Safari Snorkel helps protect your vehicle's engine from dust, snow and water ingress, ensuring clean, dry air is always available, no matter what the circumstance. Manufactured in Australia from polyethylene, the Safari Snorkel is UV stable and can handle the toughest of conditions.

Camping Accessories

ARB has a range of camping accessories to help you on your next weekend escape or off road adventure. Made from rugged and hard-wearing materials and built for the great outdoors, the range was designed to cope with the harshest of conditions. From swags and rooftop tents to camping chairs and general accessories, ARB has all your camping needs covered.
